FX FORWARD

This risk is not considered in the indicator shown above. In some circumstances you may be required to make further payments to pay for losses. Trading risks are magnified by leverage – the total loss you may incur may significantly exceed the amount invested. Values may fluctuate significantly in times of high volatility or market/economic uncertainty; such swings are even more significant if your positions are leveraged and may also adversely affect your position. As a result, margin calls may be made quickly or frequently. In the event of default, Saxo shall seek to immediately terminate, cancel and close-out all of part of any outstanding positions. Trade only after you have acknowledged and accepted the risks. You should carefully consider whether trading in leveraged products is appropriate for you.
