

Saxo Bank

What we do

Established in 1992, Saxo Bank was one of the first financial institutions to develop an online trading platform that provided ordinary investors with the same tools and market access as the professionals. Over more than two decades, Saxo Bank has grown to become a fully licensed bank in Europe specialising in trading and investment, supporting an international client base from its headquarters in Copenhagen and a growing network of offices around the world.

Business model

The best description of Saxo Bank's traditional business model is that of a facilitator. The bank offers products and services provided by third parties and offers access through its online trading platforms - the SaxoTrader and the SaxoTraderGO. Saxo Bank's business model relies to a certain extent on brokers and financial institutions who have a direct relationship with the client. They delegate the work of the operation and trade execution to Saxo Bank.
